Forward Looking Statements

This presentation contains forward-looking statements. These statements relate to future events or to future financial performance and involve known and unknown risks, uncertainties, and other factors that may cause our actual results, levels of activity, performance, or achievements to be materially different from any future results, levels of activity, performance, or achievements expressed or implied by these forward-looking statements. In some cases, you can identify forward-looking statements by the use of words such as "may," "could," "expect," "intend," "plan," "seek," "anticipate," "believe," "estimate," "predict," "potential," or "continue" or the negative of these terms or other comparable terminology. You should not place undue reliance on forward-looking statements because they involve known and unknown risks, uncertainties and other factors that are, in some cases, beyond our control and that could materially affect actual results, levels of activity, performance, or achievements.

Other factors that could materially affect actual results, levels of activity, performance or achievements can be found in Orion Energy Systems' filings with the Securities and Exchange Commission. If any of these risks or uncertainties materializes, or if our underlying assumptions prove to be incorrect, actual results may vary significantly from what we projected. Any forward-looking statements that you see or hear during this presentation reflect our current views with respect to future events and are subject to these and other risks, uncertainties, and assumptions relating to our operations, results of operations, growth strategy, and liquidity. We assume no obligation to publicly update or revise these forward-looking statements for any reason, whether as a result of new information, future events, or otherwise.

The Future

Every 4,200 Orion fixtures = 1 MW of displaced capacity

Orion (500 MW)

Capital Cost: \$500 million

Carbon Impact: 3.45 million tons displaced annually

Time to Build: < 2 years

Impact to end-users: \$289 million saved annually

Siting: Load Center

Traditional Coal-Fired Power Plant (500 MW)

Capital Cost: \$2.0 billion

Carbon Impact: 3.45 million tons generated annually

Time to Build: 3-7 years

Impact to end-users: Higher Electricity Rates

Siting: Not In My Backyard (NIMBY)

⁽¹⁾ Bookings are defined in the Company's Form 10-Q reports.

⁽²⁾ Non-GAAP reconciliation of the net present value (NPV) of future anticipated GAAP earnings per share assumes OVPP and PPA contracts are carried to full term, including all contract renewals, and are discounted at the Company's weighted average cost of capital of 7.25%.

⁽³⁾ The Company has not provided fiscal 2011 guidance for revenue or net income.

Non-GAAP Pro Forma Results

Management believes that the non-GAAP reconciliation for earnings per share presented on the previous slide better reflects the financial impact of the Company's increased volume of OVPP contracts in fiscal 2010 and the expectation for increasing OVPP contract volumes in future periods. The Company expenses all SG&A costs as incurred related to the customer sale and administrative costs of OVPP contracts, while deferring revenue recognition from these contracts over the full life of the contract term, including annual renewals. These up-front costs reduce near-term profitability as revenue and gross profit are recorded under GAAP in future periods. Non-GAAP earnings per share, as presented, restates the financial statement impact and the accretive earnings impact of discounting future operating contribution margin dollars from OVPP contracts into the fiscal period where the OVPP contract was executed.

While the forward looking information on the previous slide has been prepared in good faith, such forward looking information has not been prepared in accordance with generally accepted accounting principles and includes assumptions, estimates and projections about future results of the Company and general business conditions and such forward looking information, assumptions, estimates and forecasts are inherently uncertain. Actual results may differ, and may differ materially, from the forward looking information on the previous slide. The Company has no obligation to update or revise this forward looking information based on subsequent events or circumstances.
