Pre-commencement communications pursuant to Rule 13e-4(c) under the Exchange Act (17 CFR 240.13e-4(c))

Item 2.02. Results of Operations and Financial Condition.

On June 7, 2012, Orion Energy Systems, Inc. (the "Company") issued a press release announcing its financial results for its re-stated full fiscal-year ended March 31, 2011, full fiscal-year ended March 31, 2012 and its fiscal 2012 fourth quarter. A copy of the press release is furnished as Exhibit 99.1 to this Current Report on Form 8-K. Also furnished as Exhibit 99.2 is certain supplemental information posted on the Company's website at www.oesx.com.

<u>Item 9.01(d)</u>. <u>Financial Statements and Exhibits</u>.

Exhibit 99.1 Press Release of Orion Energy Systems, Inc., dated June 7, 2012.

Exhibit 99.2 Supplemental Financial Information.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned hereunto duly authorized.

Orion Energy Systems, Inc. Announces Fiscal 2012 Fourth Quarter and Full-Year Results

Achieves record revenue of over \$100 million in Fiscal 2012

MANITOWOC, Wis. — June 7, 2012 (BUSINESS WIRE) Orion Energy Systems, Inc. (NYSE MKT: OESX), a leading power technology enterprise, announced today financial results for its re-stated full fiscal-year ended March 31, 2011, full fiscal-year ended March 31, 2012 and its fiscal 2012 fourth quarter.

Neal Verfuerth, Chief Executive Officer of Orion commented, "We are pleased to report a record level of revenue and backlog for fiscal 2012. Crossing \$100 million in revenue is a significant inflection point for the Company. Assuming that the overall economy continues to rebound and that electricity prices remain the same or rise, we are well positioned to scale our revenues' with our core organization and infrastructure that we've invested in over the last 5 years. As a result of these strategic investments, we expect that annual revenue of \$250 million can be achieved by 2017."

Restated Fiscal Year 2011

As previously disclosed, the Company has restated its previously issued consolidated financial statements for fiscal year 2011 to account for revenue from its sales of solar photovoltaic, or PV, systems using the percentage-of-completion method rather than based upon multiple deliverable elements.

Under the Company's prior method of accounting for sales of PV systems, revenue was recognized in two stages (i) when the title to the products had been transferred and (ii) when the service installation was complete. On February 1, 2012, the Company concluded that generally accepted accounting principles, or GAAP, required that revenue from sales of solar PV systems be recognized under the percentage-of-completion method. The percentage-of-completion method, however, recognizes revenue over the life of the project. The percentage-of-completion method requires revenue from the delivery of products to be deferred and the cost of such products to be capitalized as a deferred cost and current asset on the balance sheet. The percentage-of-completion method requires periodic evaluations of the progress of the installation of the solar photovoltaic systems using actual costs incurred over total estimated costs to complete a project and requires immediate recognition of any losses that are identified on such contracts. Incurred costs include all direct materials, costs for solar modules, labor, subcontractor costs, and those indirect costs related to contract performance, such as indirect labor, supplies, and tools. The difference between the percentage-of-completion method and the multiple deliverable elements method is a question of timing of revenue recognition.

Generally, for the Company's 2011 fiscal year ended March 31, 2011, this change in accounting treatment and financial statement restatements has resulted in:

• No impact to the Company's cash, cash equivalents, short-term investments or overall cash flow;

- A decrease in the Company's revenue of \$10.5 million for its full fiscal year 2011;
- A decrease in the Company's net income of \$0.9 million and a decrease in its fully diluted earnings per share of \$0.04 for its full fiscal year 2011; and
- An increase in the Company's current assets of \$6.4 million, an increase in the Company's total assets of \$6.7 million, an increase in the Company's current liabilities of \$8.2 million and a decrease in the Company's total shareholders' equity of \$1.5 million for its fiscal year 2011.

In addition to the impact of the accounting treatment change for solar PV sales described above, the re-audit of fiscal 2011 resulted in the following additional changes:

- An increase in the Company's revenue of \$0.1 million due to adjustments for returns reserves and other net revenue adjustments which increased its net income \$0.1 million and its fully diluted earnings per share \$0.01;
- A decrease in the Company's net income of \$0.5 million due to adjustments for bad debt reserves, inventory reserves and insurance reserves which decreased its fully diluted earnings per share \$0.03;
- An increase in long-term assets of \$13.2 million and a decrease in current assets of \$13.2 million as a result of a reclassification of current inventory to long-term inventory related to the Company's investment in wireless control products; and
- An increase in the Company's net cash flows from operating activities due to an increase in its depreciation expense of \$0.4 million and an increase in its change in prepaid and other assets of \$0.2 million. A decrease in the Company's net cash flow used in investing activities due to a decrease in its capital expenditures of \$0.6 million.

The full impact of all changes as described above was as follows:

- No impact to the Company's cash, cash equivalents, short-term investments or overall cash flow;
- A decrease in the Company's revenue of \$10.4 million (11%) for its full fiscal year 2011;
- A decrease in the Company's net income of \$1.3 million (81%) and a decrease in its fully diluted earnings per share of \$0.06 (86%) for its fiscal year 2011;
- A decrease in the Company's current assets of \$8.9 million (12%), an increase in the Company's total assets of \$6.1 million (5%), an increase in the Company's current liabilities of \$8.0 million (49%) and a decrease in the Company's total shareholders' equity of \$1.9 million (2%) for its fiscal year 2011; and

• A decrease in the Company's net cash used in operating activities of \$0.1 million (1%), a decrease in its net cash used in investing activities of \$0.6 million (11%) and a decrease in its net cash provided by financing activities of \$0.7 million (26%) for its fiscal year 2011.

Full Fiscal Year 2012

For the full fiscal year 2012, revenues were \$100.6 million, an increase of 23% compared to \$82.0 million for fiscal year 2011. For fiscal year 2012, contracted revenue was \$122.6 million, an 18% increase compared to \$103.9 million for fiscal year 2011.

Total backlog at the end of the fourth quarter of fiscal 2012 was \$41.4 million, which included \$36.1 million of solar photovoltaic (PV) system orders, compared to \$21.2 million, which included \$17.0 million of solar PV orders at the end of the fourth quarter of fiscal 2011 and \$50.6 million, which included \$44.4 million of solar PV orders at the end of the third quarter of fiscal 2012. For the fourth quarter of fiscal 2012, "contracted revenue" was \$12.6 million, which was net of a \$4.3 million reduction during the quarter related to change orders received for solar PV systems where the customer assumed responsibility for the direct procurement of the solar panels. Contracted revenue is explained in more detail below.

For fiscal year 2012, the Company reported net income of \$0.5 million, or \$0.02 per fully diluted share. For fiscal year 2011, net income was \$0.3 million, or \$0.01 per fully diluted share and included the favorable one-time tax benefit of \$0.6 million, or \$0.03 per fully diluted share.

Fourth Quarter of Fiscal 2012

For the fourth quarter of fiscal 2012, the Company reported revenues of \$21.5 million, a 16% decrease compared to \$25.6 million for the fourth quarter of fiscal 2011.

For the fourth quarter of fiscal 2012, the Company reported a net loss of \$157,000, or \$(0.01) per share. For the fourth quarter of fiscal 2011, the Company's net income was \$0.5 million, or \$0.02 per share, which included a favorable one-time tax benefit of \$0.6 million, or \$0.03 per share, from the conversion of incentive stock options to non-qualified stock options.

Cash, Debt and Liquidity Position

Orion had \$23.0 million in cash and cash equivalents and \$1.0 million in short-term investments as of March 31, 2012, compared to \$11.6 million and \$1.0 million, respectively, at March 31, 2011. Total short and long-term debt was \$9.5 million as of March 31, 2012, compared to \$5.4 million as of March 31, 2011. There were no borrowings outstanding under the Company's revolving credit facility as of March 31, 2012, which has an availability of \$13.3 million.

Key Business Highlights

During the fourth quarter of fiscal 2012:

- Orion increased the number of facilities retrofitted with its energy management technologies to 7,986 as of the end of the fourth quarter fiscal 2012 (compared to 7,673 as of the end of the third quarter of fiscal 2012), representing 1.2 billion square feet of installed facilities.
- Total Megawatts, or MWs, under contract from solar projects remained at 24.0 MWs, the same as MWs under contract as of the end of the third quarter of fiscal 2012. The Company attributes the reduced contract activity in the fiscal 2012 fourth quarter to accelerated buying decisions occurring during the fiscal 2012 third quarter as customers took advantage of tax benefits that expired at the end of calendar 2011.
- The Company borrowed \$1.4 million against its Orion Throughput Agreement, or OTA, credit facility with J.P Morgan Chase Bank N.A. for the purpose of funding internally-held OTA contracts.
- The Company repurchased 180,000 shares of its common stock at an average price per share of approximately \$2.56. For the full fiscal 2012 year, the Company has repurchased 278,300 shares of its common stock at an average price per share of \$2.66.

Long-term Outlook

In keeping with the Company's long-term initiatives, it has elected to shift its guidance to a longer-term horizon from its previous annual timeframe. The Company expects to achieve \$250 million in annual revenues by fiscal 2017.

Historically, Orion has tended to experience revenue in the first quarter that represents the lowest or second-lowest quarterly revenue amount within any given fiscal year. Also, on a historical basis, the Company tends to experience a sequential decline in revenue during the first quarter of a fiscal year relative to the fourth quarter of the prior fiscal year.

The above information is based on the Company's current expectations. These statements are forward-looking and actual results may differ materially. The Company assumes no obligation to publicly update or revise its outlook. Investors are reminded that actual results may differ, and may differ materially, from these estimates for the reasons described below under the caption "Safe Harbor Statement" and in the Company's filings with the Securities and Exchange Commission.

Supplemental Information

In conjunction with this press release, Orion has posted supplemental information on its website which further discusses the financial performance of the Company for the three and twelve months ended March 31, 2012. The purpose of the supplemental information is to provide further discussion and analysis of the Company's financial results for the fourth quarter and fiscal year ended 2012. The supplemental information can be found in the Investor Relations section of Orion's Web site at http://investor.oriones.com/events.cfm.

Conference Call

Orion will host a conference call on Thursday, June 7, 2012 at 5:00 p.m. Eastern (4:00 p.m. Central/2:00 p.m. Pacific) to discuss details regarding its fiscal 2012 fourth quarter and fiscal year 2012 performance. Domestic callers may access the earnings conference call by dialing 877-754-5294 (international callers, dial 678-894-3013). Investors and other interested parties may also go to the Investor Relations section of Orion's Web site at http://investor.oriones.com/events.cfm for a live webcast of the conference call. To ensure a timely connection, it is recommended that users register at least 15 minutes prior to the webcast.

Definition of Contracted Revenues

The Company defines contracted revenues, which is a financial measurement not recognized under GAAP, as expected future revenue from firm customer purchase orders received, including both purchase orders payable immediately in cash and for potential future revenues expected to be realized under firm OTAs and solar Power Purchase Agreements, or PPAs. For OTA and cash contracted revenues for sales of its energy management systems, the Company generally expects that it will begin to recognize GAAP revenue under the terms of the agreements within 90 days from the firm contract date. For cash contracted revenues for sales of solar PV systems and for PPA contracted revenue, the Company generally expects that it will recognize GAAP revenue within 180 days from the firm contract. The Company believes that total contracted revenues are a key financial metric for evaluating and measuring the Company's performance because the measure is an indicator of the Company's success in its customers' adoption and acceptance of the Company's energy products and services as it measures firm contracted revenue value, regardless of the contract's cash or deferred financing structure and the GAAP revenue recognition treatment.

Included below is a reconciliation of contracted revenues to revenues recognized under GAAP for the fiscal 2012 fourth quarter and fiscal year-to-date period ended March 31, 2012 (in millions).

	Three months ended March 31, 2012		nonths ended h 31, 2012
Total contracted revenues	\$	12.6	\$ 122.6
Change in backlog (1)		4.9	(24.5)
Solar PV change orders (2)		4.3	4.3
PPA GAAP revenue recognized (3)		0.1	0.6
Other miscellaneous		(0.4)	(2.4)
Revenue – GAAP basis	\$	21.5	\$ 100.6

- 1) Change in backlog reflects the (increase) or decrease in cash orders at the end of the respective period where product delivery or service performance has not yet occurred. GAAP revenue will be recognized when the performance conditions have been satisfied.
- (2) Reflects the decrease in contracted revenue related to customer change orders received for solar PV systems where the customer subsequently elected to purchase solar panels directly.
- (3) Reflects GAAP revenue recognized on solar Power Purchase Agreements contracted in prior fiscal years.

Use of Non-GAAP Financial Measures

The Company reports all financial information required in accordance with GAAP and also provides certain non-GAAP financial measures. A non-GAAP financial measure refers to a numerical measure of the Company's historical or future financial performance, financial position or cash flows that includes (or excludes) amounts that are included in (or excluded from) the most directly comparable measure calculated and presented in accordance with GAAP in the Company's financial statements. The Company presents these non-GAAP financial measures as a complement to results provided in accordance with GAAP because management believes that these non-GAAP financial measures help reflect underlying trends in the Company's business and are important in comparing current results with prior period results. The presentation of this additional information is not meant to be considered in isolation or as a substitute for revenue prepared in accordance with GAAP.

The Company's management uses the foregoing non-GAAP financial measurement to evaluate its ongoing operations and for internal planning, budgeting, forecasting and business management purposes. A schedule that reconciles the Company's GAAP and non-GAAP financial measures is included with this release. Investors are encouraged to review this reconciliation to ensure that they have a thorough understanding of the reported non-GAAP financial measures and their most directly comparable GAAP financial measures.

In the Company's earnings releases, conference calls, slide presentations and/or webcasts, it may use or discuss non-GAAP financial measures as defined by SEC Regulation G. The GAAP financial measure most directly comparable to each non-GAAP financial measure used or discussed and a reconciliation of the differences between each non-GAAP financial measure and the comparable GAAP financial measure are included in this press release after the condensed consolidated financial statements.

About Orion Energy Systems

Orion Energy Systems, Inc. (NYSE MKT: OESX) is a leading power technology enterprise that designs, manufactures and deploys energy management systems – consisting primarily of high-performance, energy efficient lighting platforms, intelligent wireless control systems and direct renewable solar technology for commercial and industrial customers – without compromising their quantity or quality of light. Since December 2001, Orion's technology has benefitted its customers and the environment by reducing its customer's:

- Energy demand by 724,135 kilowatts, or 20.6 billion kilowatt-hours;
- · Energy costs by \$1.6 billion; and
- Indirect carbon dioxide emission by 13.7 million tons.

Safe Harbor Statement

Certain matters discussed in this press release are "forward-looking statements" intended to qualify for the safe harbors from liability established by the Private Securities Litigation Reform Act of 1995. These forward-looking statements may generally be identified as such because the context of such statements will include words such as "anticipate," "believe," "could," "estimate," "expect," "intend," "may," "plan," "potential," "predict," "project," "should," "will," "would" or words of similar import. Similarly, statements that describe the Company's financial guidance or future plans, objectives or goals are also forward-looking statements. Such forward-looking statements are subject to certain risks and uncertainties that could cause results to differ materially from those expected, including, but not limited to, the following: (i) deterioration of market conditions, including customer capital expenditure budgets; (ii) the Company's ability to compete and execute its growth strategy in a highly competitive market and its ability to respond successfully to market competition; (iii) increasing duration of customer sales cycles; (iv) the market acceptance of the Company's products and services, including increasing customer preference to purchase its products through its Orion Throughput Agreements, or OTAs, rather than through cash purchases; (v) the Company's ability to effectively manage the credit risk associated with its increasing reliance on OTA contracts; (vi) price fluctuations, shortages or interruptions of component supplies and raw materials used to manufacture its products; (vii) loss of one or more key employees, customers or suppliers, including key contacts at such customers; (viii) the Company's ability to effectively manage its product inventory to provide its products to customers on a timely basis; (ix) the increasing relative volume of the Company's product sales through its wholesale channel; (x) a reduction in the price of electricity; (xi) the cost to comply with, and the effects of, any current and future government regulations, laws and policies; (xii) increased competition from government subsidies and utility incentive programs; (xiii) dependence on customers' capital budgets for sales of products and services; (xiv) the Company's development of, and participation in, new product and technology offerings or applications; the availability of additional debt financing and/or equity capital; (xv) legal proceedings; (xvi) potential warranty claims; and (xvii) changes based on the completion of the Company's financial statement process, including the related fiscal year 2011 re-audit. Shareholders, potential investors and other readers are urged to consider these factors carefully in evaluating the forward-looking statements and are cautioned not to place undue reliance on such forwardlooking statements. The forward-looking statements made herein are made only as of the date of this press release and the Company undertakes no obligation to publicly update any forward-looking statements, whether as a result of new information, future events or otherwise. More detailed information about factors that may affect our performance may be found in our filings with the Securities and Exchange Commission, which are available at http://www.sec.gov or at http://www.sec.gov or at http://www.oesx.com in the Investor Relations section of the Company's Web site.

Investor Relations Contact Scott Jensen Chief Financial Officer Orion Energy Systems (920) 892-5454 sjensen@oriones.com Orion Energy Systems, Inc Supplemental Information Fiscal 2012 Fourth Quarter and Twelve Months Ended March 31, 2012 June 7, 2012

On June 7, 2012, Orion Energy Systems, Inc. issued a press release announcing financial results for our fiscal 2012 fourth quarter and full fiscal year ended March 31, 2012. The purpose of the supplemental information included below is to provide further discussion and analysis of our financial results for the fourth quarter and twelve months ended March 31, 2012. Therefore, the accompanying information provided below should be read in conjunction with the earnings press release, including the note therein regarding the restatement of our fiscal 2011 financial statements.

Statement of Operations

Revenue. Product revenue decreased from \$23.4 million for the fiscal 2011 fourth quarter to \$19.0 million for the fiscal 2012 fourth quarter, a decrease of \$4.4 million, or 19%. The decrease in product revenue was a result of decreased sales of our energy management products due to a difficult capital spending environment. Service revenue increased from \$2.2 million for the fiscal 2011 fourth quarter to \$2.4 million for the fiscal 2012 fourth quarter, an increase of \$0.2 million or 9%. The increase in service revenues was a result of the increase in sales of solar photovoltaic, or PV, systems and the related installation revenue as total revenue from solar PV systems was \$4.4 million for the fiscal 2012 fourth quarter compared to \$1.8 million for the fiscal 2011 fourth quarter. Product revenue increased from \$75.9 million for fiscal 2011 to \$90.8 million for fiscal 2012, an increase of \$14.9 million, or 20%. The increase in product revenue was due to an increase of \$19.8 million from our sales of PV systems. Service revenue increased from \$6.2 million for fiscal 2011 to \$9.8 million for fiscal 2012, an increase of \$3.6 million, or 58%. The increase in service revenue was due to increased revenue from the related installation services resulting from the increased sales of PV systems during fiscal 2012. Our service revenue from sales of our HIF energy efficiency systems decreased as a result of the increased percentage of total revenue to our wholesale channels where services are not provided. We believe that our HIF energy efficiency business continues to be challenged by a difficult capital spending environment. Accordingly, we believe that the opportunity for our Orion Throughput Agreements, or OTAs, financed sales will continue to increase during fiscal 2013.

Backlog. Total order backlog as of March 31, 2012 was \$41.4 million, which included \$36.1 million of solar PV orders, compared to a backlog of \$50.6 million as of December 31, 2011, which included \$44.4 million of solar PV orders. We currently expect approximately \$22.4 million of our backlog to be recognized as revenue in fiscal 2013 and the remainder in future years. We typically expect the non-solar portion of our backlog to be recognized as revenue within 90 days from receipt of order. Our solar PV orders are typically longer-term construction type projects and we expect revenue to be recognized between three and 24 months from receipt of order, dependent upon the size and complexity of the project. The roll-forward of cash backlog from March 31, 2011 to March 31, 2012 is as follows (in millions):

Backlog – March 31, 2011	\$ 21.2
FY12 – Plus: Cash orders and OTA contracts at net present value of future cash flows	122.6
FY12 – Less: Revenue recognized during fiscal 2012	(100.6)
FY12 – Plus: Portion of revenue recognized from PPAs during fiscal 2012	0.6
FY12 – Less: Other miscellaneous	(2.4)
Backlog – March 31, 2012	\$ 41.4

Cost of Revenue and Gross Margin. Our cost of product revenue decreased from \$15.6 million for the fiscal 2011 fourth quarter to \$12.4 million for the fiscal 2012 fourth quarter, a decrease of \$3.2 million, or 21%. Our cost of service revenue increased from \$1.5 million for the fiscal 2011 fourth quarter to \$2.0 million for the fiscal 2012 fourth quarter, an increase of \$0.5 million, or 33%. Total gross margin was 33.0% and 33.3% for the fiscal 2011 fourth quarter and fiscal 2012 fourth quarter, respectively. Our gross margin on renewable revenues was 24.3% during the fiscal 2012 fourth quarter and our gross margin from our HIF integrated systems revenue for the fiscal 2012 fourth quarter was 35.6%. Cost of product revenue increased from \$49.8 million for fiscal 2011 to \$62.8 million for fiscal 2012, an increase of \$13.0 million, or 26%. Cost of service revenue increased from \$4.6 million for fiscal 2011 to \$7.7 million for fiscal 2012, an increase of \$3.1 million, or 67%. Total gross margins declined to 29.9% for fiscal 2012 from 33.7% for fiscal 2011. The decrease in total gross margin in fiscal 2012 was due to the higher mix of renewables revenue which has lower gross margins than sales of our HIF energy management systems. Gross margins from the sale of our solar PV systems were 18.2% for fiscal 2012 and our gross margins from the sale of our HIF energy management systems were 34.5% for fiscal 2012.

General and Administrative Expenses. Our general and administrative expenses decreased from \$3.0 million for the fiscal 2011 fourth quarter to \$2.7 million for the fiscal 2012 fourth quarter, a decrease of \$0.3 million, or 10%. The decrease was a result of decreased expenses for compensation and legal expenses. Our general and administrative expenses decreased from \$11.7 million for fiscal 2011 to \$11.4 million for fiscal 2012, a decrease of \$0.3 million, or 3%. The decrease was a result of \$0.4 million in reduced legal expenses and a \$0.3 million reduction in compensation costs and other discretionary spending, offset by an increase in depreciation of \$0.4 million resulting from the new enterprise resource planning, or ERP, system put into service at the beginning of fiscal year 2012.

Sales and Marketing Expenses. Our sales and marketing expenses increased from \$3.6 million for the fiscal 2011 fourth quarter to \$4.0 million for the fiscal 2012 fourth quarter, an increase of \$0.4 million, or 11%. Our sales and marketing expenses increased from \$13.7 million for fiscal 2011 to \$15.6 million for fiscal 2012, an increase of \$1.9 million, or 14%. The increase was a result of our investment into the formation and staffing of our telemarketing function, the establishment and staffing of a Houston technology center, headcount additions for retail sales and project management to support the increase in our solar PV revenue during fiscal 2012. Total sales and marketing employee headcount was 85 and 100 at March 31, 2011 and March 31, 2012, respectively.

Research and Development Expenses. Our research and development (R&D) expenses increased from \$0.5 million for the fiscal 2011 fourth quarter to \$0.7 million for the fiscal 2012 fourth quarter, an increase of \$0.2 million, or 40%. Our research and development expenses increased from \$2.3 million for fiscal 2011 to \$2.5 million for fiscal 2012, an increase of \$0.2 million, or 9%. The increase in expenses for fiscal 2012 was due to increased spending on the development of new product offerings, including our light emitting diode, or LED, product and energy management controls initiatives.

Interest Expense. Our interest expense was relatively flat at \$0.2 million for the fiscal 2011 and fiscal 2012 fourth quarter. Our interest expense increased from \$0.4 million for fiscal 2011 to \$0.6 million for fiscal 2012, an increase of \$0.2 million, or 50%. The increase in interest expense for fiscal 2012 was due to the full year impact of additional debt funding completed during fiscal 2011 and additional debt funding completed during fiscal 2012 for the purpose of financing our OTA projects.

Gain (loss) on sale of receivables. Our loss from the sale of receivables from our OTA contracts decreased from \$1.0 million for fiscal 2011 to a gain from the sale of receivables of \$32,000 for fiscal 2012. Due to the establishment of multiple financing arrangements for OTAs during fiscal 2011 and 2012, in future periods, we do not expect to sell OTA contracts at significant losses similar to fiscal 2011.

Interest Income. Our interest income increased from \$0.1 million for the fiscal 2011 fourth quarter to \$0.3 million for the fiscal 2012 fourth quarter, an increase of \$0.2 million, or 200%. Interest income increased from \$0.6 million for fiscal 2011 to \$0.9 million for fiscal 2012, an increase of \$0.3 million, or 50%. Interest income increased due to an increase in the number and dollar amount of completed OTA contracts and the related interest income under the financing terms.

Income Taxes. Our income tax benefit decreased from \$0.3 million for the fiscal 2011 fourth quarter to \$0.1 million for the fiscal 2012 fourth quarter, a decrease of \$0.2 million, or 67%. Our income taxes increased from a benefit of \$1.2 million for fiscal year 2011 to income tax expense of \$0.4 million for fiscal 2012. Our effective income tax rate for the fiscal year 2011 was a benefit rate of 137.8%, compared to an income tax rate of 43.3% for the fiscal year 2012. During the fourth quarter of fiscal 2011, we converted almost all of our existing incentive stock options, or ISOs, to non-qualified stock options, or NQSOs. This conversion was applied retrospectively allowing us to benefit from \$0.6 million of income tax expense related to non-deductible ISO stock compensation expense that was previously deferred for income tax purposes. The conversion reduced our effective tax rate for the full fiscal year to a benefit rate of 137.8% from a preconversion income tax expense rate of 69.8%. The conversion of ISOs to NQSOs greatly reduced the effective tax rate volatility that we have historically experienced at nominal pre-tax earnings levels. The change in tax rate versus the prior fiscal year is due to the difference between taxable losses during fiscal 2011 and the related impact of the non-deductible stock compensation expense and taxable income during fiscal 2012, along with the impact of federal credits available to us.

Statement of Cash Flows

Cash Flows Related to Operating Activities. Cash used in operating activities primarily consist of net income adjusted for certain non-cash items, including depreciation and amortization, stock-based compensation expenses, income taxes and the effect of changes in working capital and other activities.

Cash provided by operating activities for fiscal 2012 was \$11.5 million and consisted of net cash provided from changes in operating assets and liabilities of \$5.9 million and net income adjusted for non-cash expense items of \$5.6 million. Cash provided by working capital improvements was primarily due to the completion of contracts and a reduction in deferred project costs, improved collections of our accounts receivable and an increase in accounts payable related to payment terms on inventory purchases during the fiscal 2012 fourth quarter. These benefits were partially offset by a decrease in deferred revenue related to project completions and an increase in inventory for purchases described in the section below.

Cash used in operating activities for fiscal 2011 was \$8.6 million and consisted of net cash of \$13.8 million used for working capital purposes offset by net income adjusted for non-cash expense items of \$5.2 million. Cash used for working capital consisted of an increase of \$12.9 million in accounts receivable due to the increase in revenue and advanced customer billings, an \$8.0 million increase in deferred contract costs for material and service expenses incurred for inprocess projects and a \$3.1 million increase in inventory for purchases of ballast components and wireless controls inventories. Cash provided by working capital included a \$9.7 million increase in deferred revenue for advanced customer billings and a \$4.7 million increase in accounts payable related to payment terms on inventory purchases during the fiscal 2011 fourth quarter.

Cash Flows Related to Investing Activities. For fiscal 2012, cash used in investing activities was \$4.5 million which included \$4.3 million for capital improvements related to our information technology systems, manufacturing and tooling improvements and facility investments and \$0.2 million for investment in patent activities.

For fiscal 2011, cash used in investing activities was \$5.1 million which included \$2.6 million for capital improvements related to our information technology systems, renewable technologies, manufacturing and tooling improvements and facility investments, \$2.3 million invested in equipment related to our PPA finance programs and \$0.2 million for patent investments.

Cash Flows Related to Financing Activities. For fiscal 2012, cash flows provided by financing activities were \$4.5 million. This included \$6.0 million in new debt borrowings to fund OTAs, \$1.0 million for excess tax benefits from stock-based compensation and \$0.2 million received from stock option and warrant exercises. Cash flows used in financing activities included \$1.9 million for repayment of long-term debt, \$0.7 million used for common share repurchases and \$0.1 million for debt closing costs.

For fiscal 2011, cash flows provided by financing activities were \$2.0 million. This included \$3.7 million in new debt borrowings to fund OTA projects and \$0.5 million received from stock option and warrant exercises. Cash flows used in financing activities included \$2.0 million for repayment of long-term debt, \$0.1 million for tax expense from stock based compensation and \$0.1 million for costs related to the credit agreement.

Working Capital

Our net working capital as of March 31, 2012 was \$44.5 million, consisting of \$67.2 million in current assets and \$22.7 million in current liabilities. Our net working capital as of March 31, 2011 was \$40.0 million, consisting of \$64.2 million in current assets and \$24.2 million in current liabilities. Our current accounts receivables decreased from our prior fiscal year end by \$4.2 million as a result of increased collections and our increased revenues from our solar PV systems. Our net collection terms for solar PV sales are typically net 25 days or less versus our 30-60 day collection terms for sales of our lighting and energy management systems. Our inventories increased from our fiscal 2011 year end by \$2.3 million due to an increase in the level of our fluorescent lamp inventories. During fiscal 2012, we increased our inventories of fluorescent lamps by \$2.2 million due to concerns over shortages of rare earth minerals used in the production of fluorescent lamps.

Capital Spending

Capital expenditures totaled \$4.3 million for fiscal 2012 due to investments in information technologies, training and research facility additions, other tooling and equipment for new products, as well as cost improvements in our manufacturing facility. We expect to incur a total of approximately \$3.5 to \$3.7 million in capital expenditures during fiscal year 2013, excluding capital to support our OTA contracts. Our capital spending plans predominantly consist of further cost improvements in our manufacturing facility, improvements to our building and headquarters, new product development and investment in information technology systems. We expect to finance these capital expenditures primarily through our existing cash, equipment secured loans and leases, to the extent needed, long-term debt financing, or by using our available capacity under our credit facility.

Liquidity and Capital Resources

We had approximately \$23.0 million in cash and cash equivalents and \$1.0 million in short-term investments as of March 31, 2012, compared to \$11.6 million and \$1.0 million at March 31, 2011. Additionally, as of March 31, 2012, we had \$13.3 million of borrowing availability under our revolving credit agreement. We also had \$1.8 million of availability on our OTA credit agreement which was completed during the second quarter of fiscal 2012, which can be utilized for the sole purpose of funding customer OTA projects through September 2012. During fiscal 2012, we borrowed \$6.0 million to finance our OTA projects. We believe that having multiple funding sources for our internally held OTA contracts, as well as having multiple external sources that will purchase the OTA contracts from us, has greatly reduced the cash strain created by funding these contracts ourselves and is no longer an impediment to our ability to increase the

number of OTA contracts we complete in the future. We believe that our existing cash and cash equivalents, our anticipated cash flows from operating activities and our borrowing capacity under our revolving credit facility will be sufficient to meet our anticipated cash needs for at least the next 12 months, dependent upon our growth opportunities with our cash and finance customers.

Statistical Data

The following table presents certain statistical data, cumulative from December 1, 2001 through March 31, 2012, regarding sales of our HIF lighting systems, total units sold (including HIF lighting systems), customer kilowatt demand reduction, customer kilowatt hours saved, customer electricity costs saved, indirect carbon dioxide emission reductions from customers' energy savings, and square footage we have retrofitted. The assumptions behind our calculations are described in the footnotes to the table below.

	Cumulative From
	December 1,
	2001 Through March 31.
	2012
	(in thousands, unaudited)
HIF lighting systems sold (1)	2,304
Total units sold (including HIF lighting systems)	3,122
Customer kilowatt demand reduction (2)	724
Customer kilowatt hours saved (2)(3)	20,606,469
Customer electricity costs saved (4)	\$ 1,586,698
Indirect carbon dioxide emission reductions from customers' energy savings (tons) (5)	13,674
Square footage retrofitted (6)	1,195,491

- (1) "HIF lighting systems" includes all HIF units sold under the brand name "Compact Modular" and its predecessor, "Illuminator."
- A substantial majority of our HIF lighting systems, which generally operate at approximately 224 watts per six-lamp fixture, are installed in replacement of HID fixtures, which generally operate at approximately 465 watts per fixture in commercial and industrial applications. We calculate that each six-lamp HIF lighting system we install in replacement of an HID fixture generally reduces electricity consumption by approximately 241 watts (the difference between 465 watts and 224 watts). In retrofit projects where we replace fixtures other than HID fixtures, or where we replace fixtures with products other than our HIF lighting systems (which other products generally consist of products with lamps similar to those used in our HIF systems, but with varying frames, ballasts or power packs), we generally achieve similar wattage reductions (based on an analysis of the operating wattages of each of our fixtures compared to the operating wattage of the fixtures they typically replace). We calculate the amount of kilowatt demand reduction by multiplying (i) 0.241 kilowatts per six-lamp equivalent unit we install by (ii) the number of units we have installed in the period presented, including products other than our HIF lighting systems (or a total of approximately 3.1 million units).
- (3) We calculate the number of kilowatt hours saved on a cumulative basis by assuming the demand (kW) reduction for each fixture and assuming that each such unit has averaged 7,500 annual operating hours since its installation.
- (4) We calculate our customers' electricity costs saved by multiplying the cumulative total customer kilowatt hours saved indicated in the table by \$0.077 per kilowatt hour. The national average rate for 2011, which is the most current full year for which this information is available, was \$0.1002 per kilowatt hour according to the United States Energy Information Administration.

- (5) We calculate this figure by multiplying (i) the estimated amount of carbon dioxide emissions that result from the generation of one kilowatt hour of electricity (determined using the Emissions and Generation Resource Integration Database, or EGrid, prepared by the United States Environmental Protection Agency), by (ii) the number of customer kilowatt hours saved as indicated in the table.
- (6) Based on 3.1 million total units sold, which contain a total of approximately 15.5 million lamps. Each lamp illuminates approximately 75 square feet. The majority of our installed fixtures contain six lamps and typically illuminate approximately 450 square feet.

Safe Harbor Statement

Certain matters discussed in this supplemental information are "forward-looking statements" intended to qualify for the safe harbors from liability established by the Private Securities Litigation Reform Act of 1995. These forward-looking statements may generally be identified as such because the context of such statements will include words such as "anticipate," "believe," "could," "estimate," "expect," "intend," "may," "plan," "potential," "predict," "project," "should," "will," "would" or words of similar import. Similarly, statements that describe our financial guidance or future plans, objectives or goals are also forward-looking statements. Such forward-looking statements are subject to certain risks and uncertainties that could cause results to differ materially from those expected, including, but not limited to, the following: (i) deterioration of market conditions, including customer capital expenditure budgets; (ii) our ability to compete and execute our growth strategy in a highly competitive market and our ability to respond successfully to market competition; (iii) increasing duration of customer sales cycles; (iv) the market acceptance of our products and services, including increasing customer preference to purchase our products through our Orion Throughput Agreements, or OTAs, rather than through cash purchases; (v) our ability to effectively manage the credit risk associated with our increasing reliance on OTA contracts; (vi) price fluctuations, shortages or interruptions of component supplies and raw materials used to manufacture our products; (vii) loss of one or more key employees, customers or suppliers, including key contacts at such customers; (viii) our ability to effectively manage our product inventory to provide our products to customers on a timely basis; (ix) the increasing relative volume of our product sales through our wholesale channel; (x) a reduction in the price of electricity; (xi) the cost to comply with, and the effects of, any current and future government regulations, laws and policies; (xii) increased competition from government subsidies and utility incentive programs; (xiii) dependence on customers' capital budgets for sales of products and services; (xiv) our development of, and participation in, new product and technology offerings or applications; the availability of additional debt financing and/or equity capital; (xv) legal proceedings; (xvi) potential warranty claims; (xvii) our failure to maintain effective internal controls; and (xviii) changes based on the Company's completion of its financial statement restatement process. Shareholders, potential investors and other readers are urged to consider these factors carefully in evaluating the forward-looking statements and are cautioned not to place undue reliance on such forward-looking statements. The forward-looking statements made herein are made only as of the date of this supplemental information and we undertake no obligation to publicly update any forward-looking statements, whether as a result of new information, future events or otherwise. More detailed information about factors that may affect our performance may be found in our fillings with the Securities and Exchange Commission, which are available at http://www.sec.gov or at http://www.oesx.com in the Investor Relations section of our Web site.
